

One of the **top ten** errors you must not make

There / Their / They're

Get it right!

They're

Stands in place of *they are*

Their

Means that something belongs to them
(usually comes before a noun)

There

Refers to a place (*over there*)

Or existence (*There are...*)

The mental process

- Does “they are” fit? = *they’re*
- Does it show belonging? = *their*
- If not, then it should be about place or existence = *there*
